

» Leaf Guard

Solutions for homes with eavestroughs that have already been installed.

Free yourself from the bothersome chore of having to clean out your eavestroughs once or even several times a year. Clogged eavestroughs are a thing of the past. With state-of-the-art technology from Alu-Rex, you will never have to worry about your eavestroughs again!

We show you the product and quote the price, but more importantly, we give you peace of mind.

We install the one and only leaf guard with a 25-year warranty. Made of top-quality aluminum, the Gutter Clean System™ is solid, will never rust and will not deteriorate.

gutter clean™ SYSTEM ————— The worry-free system —————

The Gutter Clean System™ is a perforated aluminum sheet that attaches on top of any eavestrough that has already been installed on your home. It is invisible from the ground and does not change the look of your home at all; the aesthetic and integrity of your residence is entirely maintained.

With the Gutter Clean System™, you no longer have to worry because it takes care of any possible eavestrough problem. Our system blocks leaves, snow, ice and all sorts of debris from entering your eavestroughs. Since snow and ice cannot enter the eavestroughs, there is less weight that they have to support.

This unique and innovative product is compatible with any type of eavestrough and our professional team can install it in less than half a day.

ALU-REX PROTECTION

Water can flow normally inside your eavestroughs all year round as easily as in the summer!

A product of true genius! Thanks to Alu-Perf technology developed by Alu-Rex, the Gutter Clean System™ can handle almost 3-times the amount of rainfall than the most abundant precipitations recorded in Canada and can fight off debris with unrivaled efficiency.

Known throughout the world for several years now, Alu-Rex products have satisfied many thousands of homeowners around the world.

Gutter Clean System Leaf Guard with **dura clean**

Dripping water causes unsightly black lines to form on the front of your eavestroughs. Even worse is if the spikes that attach your eavestroughs to your home are rusted, then the aesthetic of your property is seriously diminished.

DIRTY EAVESTROUGHS

AFTER

ALU-REX APPEAL

The most brilliant ideas are always the simplest.

The ingenious design of the leaf guard with the Dura-Clean option is that it deflects dripping water and covers any rusty spikes in your eavestroughs at the same time.

? Did you know?

There are 74 different species of mosquitoes in Canada, of which 64 varieties bite humans and domestic animals.

Mosquitoes lay their eggs in moist environments, and if your eavestroughs are retaining stagnant water because they are being blocked by leaves, you risk the possibility of being constantly bombarded by these biting insects. There is no doubt that your eavestroughs affect your comfort and health.

Choose now the worry-free Gutter Clean System™! Contact us for a free assessment of the installation costs.
